SUMMARY

Microsoft-certified Data Analyst (Fabric Analytics Engineer Associate, DP-600) skilled in Python, PySpark, SQL, Power BI, Tableau, and Microsoft Fabric. Analyzed 1.5M+ records, built 10+ dashboards, and designed an enterprise dimensional data warehouse (9 dimensions, 10 facts) plus an end-to-end Medallion-architecture retail analytics platform.

CORE SKILLS

- **Languages:** Python (Pandas, NumPy, PySpark, Matplotlib, Seaborn), SQL, T-SQL, DAX
- **Analytics:** EDA, Data Cleaning & Wrangling, Statistical Analysis, Data Modeling (Star Schema, SCD Type 2), ETL/ELT, Medallion Architecture, Trend & Root-Cause Analysis
- **BI & Platforms:** Power BI, Tableau, Excel, Microsoft Fabric (Lakehouse, Warehouse, Dataflow Gen2, Notebooks, Semantic Models, Pipelines), Jupyter, GitHub, SQLDBM
- **Other:** Stakeholder Communication, Data Storytelling, Data Validation, AI Prompting & Responsible AI Use, Training & Curriculum Development

EXPERIENCE

Developer — SustuneTech, Bengaluru Sep 2025 – Present

- Led design of the SITLBI Sales Analytics Data Warehouse in Microsoft Fabric: 9 dimension and 10 fact tables in T-SQL covering sales, AR, collections, stock, renewals, and targets; coordinated design reviews with senior stakeholders.
- Implemented surrogate/natural keys, SCD Type 2 history tracking, and audit fields; documented the model with an ER diagram in SQLDBM.
- Primary technical contributor on end-to-end analytics workflows (ingestion, modeling, reporting) using Lakehouse, Dataflows Gen2, and Semantic Models; worked directly with leadership on design and performance best practices.
- Guided 26 interns on Microsoft Fabric and data modeling across a 5-month curriculum, achieving a 90%+ completion rate.

Data Analytics Trainee — Trainity (Training Program & Case Projects) Apr 2025 – Jun 2025

- Cleaned and preprocessed 500K+ records with Python (Pandas, NumPy) and built ETL pipelines for retail and finance datasets.
- Wrote 40+ optimized SQL queries, improving extraction speed by 50%.
- Built 10+ interactive Tableau dashboards and applied EDA to surface trends, anomalies, and key patterns.

Student Intern — eTech Prowess Feb 2025 – May 2025

- Tested and verified 15+ digital IC designs (memory units, processor cores) using simulation tools; documented 8 design issues with 100% resolution before submission.

PROJECTS

End-to-End Retail Sales Intelligence Platform

GitHub

Microsoft Fabric, PySpark, SQL, Power BI, DAX

- Processed 1.06M+ retail transaction rows on a Bronze–Silver–Gold Medallion Architecture in Microsoft Fabric.
- Built PySpark notebooks for ingestion, transformation, and validation, retaining data-quality flags for cancellations, negative quantities, and missing customer IDs.
- Created Gold-layer tables for monthly sales, country, and product performance; delivered a four-page Power BI dashboard (Executive Overview, Geographic Analysis, Product Performance, Data Quality & Insights).
- Orchestrated the workflow with Fabric notebooks and a pipeline.

Smart Anti-Theft Floor Mat System Using IoT and Sensors

Final Year Project

- Prototyped an IoT security system with a machine learning algorithm that filtered 95% of irrelevant signals, improving threat detection accuracy.

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600), Oct 2026 | Score: 919/1000
- Google Prompting Essentials — Google (Coursera), May 2026
- Google AI Essentials — Google (Coursera), May 2026
- Power BI Workshop
- Fabric Analyst in a Day
- Deloitte Australia Data Analytics Job Simulation — Forage
- ExcelR Data Science with Machine Learning

EDUCATION

B.E. in Electronics & Communication Engineering

Jun 2025

Don Bosco Institute of Technology, Bengaluru (VTU) | CGPA: 7.96

- Class XII, Karnataka State Board, HBGPU College, Kumta (2021, 81.17%) | Class X, CVSK High School, Kumta (2019, 81.6%)
